PROFESSIONAL SUMMARY

Computer Science student at Moi University and Software Engineering Intern at Nawi, building FHIR-based health information systems on both the OHS Foundation and OpenSRP platforms. Full-stack developer experienced in Java/Spring Boot, the MERN stack and Docker, with a record of designing, securing and deploying web applications using JWT authentication and role-based access control (Keycloak and Spring Security).

EDUCATION

Moi University *Eldoret, Uasin Gishu, Kenya*

Bachelor of Science in Computer Science (Software Engineering concentration) *Expected Dec 2027*

- **Coursework:** Software Engineering, Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Operating Systems, Computer Networks, Artificial Intelligence**.**

EXPERIENCE

Nawi *June 2026 – Present*

Software Engineering Intern (Remote) — OHS Foundation and OpenSRP platforms

- **Stack integration:** Configure and integrate components of the OHS Foundation stack, including Keycloak, HAPI FHIR and FHIR Gateway, and work on the OpenSRP platform as a separate system, for FHIR-based health information systems.
- **Access control:** Configured Keycloak RBAC (realm-management client roles and FHIR resource permissions) and traced how roles flow from the token through to UI permissions in fhir-web.
- **Frontend:** Configure and extend nawitech/fhir-web (React, TypeScript), including a configuration-driven deployment and new features such as a phone number field in the user-creation form.
- **Onboarding wizard:** Designing a multi-step onboarding package (Location → Organization → Care Team → Users) with draft persistence, creating linked FHIR resources.
- **Backend:** Work with ohs-player-reference-backend, a Spring Boot plugin loaded into FHIR Gateway; diagnosed a LocationHierarchy response-shape mismatch and a bug where hardcoded timeouts bypassed the configured FHIR client settings.

Kisii University *April 2026 – June 2026*

IT Intern

- **IT support:** Provided first-line support to users with workstation, software and connectivity issues, including software installation and updates.
- **Network troubleshooting:** Diagnosed and resolved connectivity problems, including IP address allocation and DHCP fixes, and replaced and traced Ethernet cabling.
- **Maintenance:** Carried out routine maintenance of hardware and printers, assisted with server room operations and documented ICT assets and records.

Watoto ni wetu Foundation *Feb 2025 – Jun 2025*

Web Developer

- Delivered front-end development support, building designs aligned with the organization's brand standards.
- Improved user experience through responsive design and website performance optimization.
- Built the website using React.js and CSS.

Live Demo: https://felix-kebaki.github.io/WWFoundation/

Future Interns *1-Month Internship*

Web Developer Intern

- Completed a one-month web developer internship found through LinkedIn, working through practical tasks to build and apply web development skills.

PROJECTS

TaskTracker *Sept 2025 – Jan 2026*

MongoDB, Express.js, React, Node.js

- Built a full-stack MERN application with JWT authentication, role-based access control and RESTful APIs.
- Implemented CRUD features for goals, daily objectives, events and team tasks, plus file uploads via Multer and Cloudinary.

- Modeled users, teams, tasks, submissions and calendar events in MongoDB; deployed frontend and backend on Heroku.

Live Demo: https://tasktracker-d936c3bd796d.herokuapp.com/

SimplyRecipes *Aug 2024 – Nov 2024*

React.js, CSS, TheMealDB API

- Built a responsive recipe app that dynamically fetches meals, ingredients and instructions from TheMealDB API.
- Implemented search and state management with React hooks; deployed on GitHub Pages.

Live Demo: https://felix-kebaki.github.io/recipe/

Kenya Airways Reservation System *Backend Developer*

Java, Spring Boot, Spring Security, JWT, PostgreSQL

- Built a secure backend with REST APIs for flight, employee and booking management.
- Implemented role-based access control for administrative operations such as flight creation and resource assignment.
- Integrated JWT authentication with HTTP-only cookies; collaborated with a teammate using Git and GitHub.

Live Demo: https://kenyaairways-43fd8dd92afc.herokuapp.com/login

AssignHub *Mar 2026 – Apr 2026*

Spring Boot, React, PostgreSQL

- Developed a full-stack academic system for managing assignments and submissions.
- Designed normalized database schemas using One-to-Many, Many-to-One and join entities to model students, units, assignments and submissions.
- Built RESTful APIs for assignment creation, submission handling, grading and feedback.

Pixel Studio *Apr 2026*

HTML, CSS, JavaScript

- Designed a responsive website prototype for a photography studio, with a session booking interface focused on usability and accessibility.

Live Demo: https://felix-kebaki.github.io/PixelStudio/

SKILLS

- **Languages:** Java, JavaScript, TypeScript, Kotlin
- **Frameworks & Technologies:** Spring Boot, Spring Security, Microservices Architecture, REST APIs, React, Node.js, Express.js, HTML, CSS
- **Health IT:** FHIR, HAPI FHIR, OHS Foundation, OpenSRP
- **DevOps & Tools:** Docker, Keycloak, Git, GitHub, VS Code, Android Studio, Postman
- **Databases:** PostgreSQL, MongoDB
